

Vortex Flow Sensors VA Di
also suitable for applications in condensation and particle laden gases

Measurable variable

- actual flow rate
- standard velocity
- standard flow rate (in combination with pressure and temperature sensors)

Design

- measuring tube

Functional principle

- vortex meter for measuring flow rate and volume
- ultrasonic measurement of the vortex shedding

Advantages

- low starting value
- high measuring dynamics (up to 1 : 100)
- no moving parts
- maximum fatigue strength
- corrosion resistant
- operates to a large extent irrespective of gas composition
- low pressure drop
- easy adjustment to process parameter

Medium

- primarily single-phase gas mixtures, e.g. air, nitrogen, oxygen, methane, natural gas, flare gas, ammonia, argon, carbon monoxide, superheated steam, combustion exhaust gas, biogas, sewage gas.

Other gases or gas mixtures on request

Range and examples of application

- flow measurement, for example, of air, exhaust gas, process gas, bio and sewage gas, engine intake air, exhaust emissions, gases laden with particles, dust and fibres, superheated steam

Particles, condensation, humidity in the gas

- charges in the gas caused by particles such as dust and fibres do not affect the measurement, as long as abrasion and agglomeration do not occur on the sensor

- measurement uncertainty remains unaffected by a relative gas humidity of less than 100 % and a slight accumulation of condensate on the sensor

Model designation / order code (example)

| VA Di 40 | G | E | 40 m/s | p10 | ZG1 |

| 100 | 220 | 20 | 180 | 18 | 8 | 200 | 286 | 15 |

flange dimensions as per DIN EN 1092-1 Form B1 (other flange dimensions on request)

(2) Medium

Gases

(3) Materials in contact with the medium

| design | material |
|------------|--|
| ... GE ... | stainless steel 1.4404, 1.4571, 1.4581, ceramics |
| ... GT ... | titanium 3.7035 (grade 2), ceramics |
| ... GH ... | Hastelloy 2.4610 (HC4), ceramics |
| ... GL ... | tantalum, ceramics |

(4) Measuring range

| Di [mm] | flow rate [m³/h] | average flow velocity [m/s] |
|------------|---------------------|--------------------------------|
| 40 | 1.8 ... 135 | 0.4 ... 30 |
| 50 | 2.8 ... 212 | 0.4 ... 30 |
| 80 | 7.2 ... 724 | 0.4 ... 40 |
| 100 | 11.0 ... 1131 | 0.4 ... 40 |

Calibration

For each sensor, one of the two calibration options listed below must be selected.

| calibration option | art no. |
|---|------------------------|
| ISO calibration (inclusive calibration certificate) calibration medium air, adjustment in sensor measuring range up to max. 1600 m³/h, 6 calibration values in the scaled measuring range | CQ-1600 ISO (standard) |
| DAkkS calibration (inclusive calibration certificate) calibration medium air, adjustment in sensor measuring range up to max. 1600 m³/h, 6 calibration values in the scaled measuring range | CQ-1600 DAKKS |

| | |
|-------------------------|---|
| measurement uncertainty | < 1 % of measured value + 0.3 % of terminal value (at +20 °C / 1000 hPa) |
| repeatability | ± (0.2 % of measured value + 0.025 % of terminal value) |
| input/output sections | in order to achieve as great a measurement accuracy as possible, an input/output section of 20/10 x Di is recommended. The input section can be reduced considerably by using a flow rectifier (see Accessories). Further information on this subject can be found in the Operating Instructions U283_VADi_B_e. |

(5) Max. working pressure

up to 10 bar / 1 MPa overpressure

(6) Design

as in Drawing 1

Connection housing AS102

| | |
|------------------|--|
| Dimensions | L/W/H: 100/80/150 mm |
| Material | die-cast aluminium G Al Si12 / DIN 1725 |
| Protection class | IP65, IEC 529 and EN 60 529 |
| Connection | bush for shielded cables with external diameter 5 ... 10 mm, contacting of the overall copper shielding by the metallic screwed cable glands |

Electromagnetic compatibility (EMC)

according to EN 61 000-6-2 and EN 61 000-6-4

Functional Safety / Safety Integrity Level (SIL)

according to DIN EN 61508 part 1 to part 7 and DIN EN 61511 part 1 to part 3, SIL2;
please pay attention to our document U400!

Mounting attitude

| | |
|-----|--|
| any | to ensure that the sensor remains operative in horizontal pipeline even with moderate condensation, sensors VA Di 40, VA Di 50, VA Di 80 and VA Di 100 should be installed with the connection housing pointing sideways. In vertical pipeline the attitude for all sensors VA Di ... - also in case of moderate condensation - can be chosen freely. |
|-----|--|

Options (A) ... (C)

| sealing material (A) | calibration pressure (B) | Ex-protection (C) |
|-------------------------|---|----------------------|
| sealing material | working temperature range of the medium * | Art.-Nr. |
| FKM (standard) | -20 ... +180 °C | B015/900 |
| silicone | -40 ... +180 °C | B015/901 |
| KALREZ ® (Comp. 4079) | 0 ... +180 °C | B015/902 |
| EPDM | -20 ... +160 °C | B015/903 |

permissible ambient temperature *

| | |
|---|----------------|
| with integrated transducer UVA, without display | -25 ... +60 °C |
| with integrated transducer UVA, with display | -25 ... +60 °C |
| without integrated transducer UVA | -25 ... +80 °C |

* When used in hazardous areas, the media and ambient temperature are limited according to the valid operating instructions

Option (B)

| calibration pressure | comment | art. no. |
|----------------------|---|----------|
| atmospheric pressure | with working pressures greater than 3 bar rel. calibration should be carried out at average working pressure to reduce the risk of measurement uncertainty | B015/910 |
| ____ bar rel. | calibration pressure selectable in range 1 ... 10 bar rel.; with working pressures greater than 3 bar rel. calibration at average working pressure is recommended to ensure the smallest possible measurement uncertainty | B015/911 |

Option (C)

| type of protection | comment | art. no. |
|---|---|-----------|
| gas-Ex: CE <Ex> II 1/2 G Ex ia IIC T6 Ga/Gb category 1/2G (zone 0/1) | only in conjunction with: • isolation/supply unit LDX2 and 'non-Ex evaluation unit' • compatible separate evaluation unit with Ex-input (see below) • temperature range of the medium as electrical apparatus for Category 1/2G -20...+60 °C; 2G -40...+180 °C; 1/2D, 2D -40...+180 °C | VAEX0 ** |
| dust-Ex: CE <Ex> II 1/2D Ex ia IIIC TX Da Db category 1/2D (zone 20/21) | category 3G (zone 2) category 3D (zone 22) | VAEX2E ** |
| CE <Ex> II 3 G Ex ec IIC T6 Gc X CE <Ex> II 3 D Ex tc IIIC TX Dc X | | |

**remark: media and ambient temperature according to the valid operating instructions

Output v/VA, v/VA-Ex, 4-20 mA or 0-10 V

| | |
|---|--|
| output sensor v/VA | Höntzsch evaluation unit ** with v/VA input is necessary for signal interpretation |
| output sensor v/VA-Ex, (sensor with Option (C) see above) | Höntzsch evaluation unit with intrinsically safe input v/VA-Ex or an evaluation unit** with input v/VA together with a series connection isolation/supply unit LDX2 is necessary for signal interpretation |
| output 4-20mA or 0-10V | with transducer UVA integrated in the connection housing (see Page 5) ** e. g. UVA, µP Vortex, VT-VA, VP-VA or VTP-VA |

optional transducer UVA, integrated in the sensor connection housing

| | | |
|---|---|--|
| analog output flow 4-20 mA or 0-10 V (please select) | 4 ... 20 mA resistance max. 400 Ohm art. no. B015/050 | 0 ... 10 V impedance max. 1 kOhm art. no. B015/051 |
| output limit value or quantity pulse | potential-free relay contact (normally open contact), max. 300 mA / 27 VDC | |
| PC interface | RS232 | |
| self-monitoring | output signals are electrically isolated from the power supply parameter settings,sensor interface; in case of error: analog output less than 3.6 mA or <-0.2 V | |
| connection | 'push in' PCB terminals; no tools necessary for strand connection; disconnect strands by applying pressure with a pen or screwdriver; for strands with cross-section 0.14 ... 1.5 mm ² | |
| power supply | 24 V DC (20 ... 27 V DC) | |
| power consumption | less than 5 W | |
| setting parameter | analog output, time constant, profile factor, tube inside diameter, limit value or quantity pulse (quality rating adjustable), switch from actual/standard flow with setting parameters 'working pressure' and 'working temperature' | |
| setting parameter with PC software UCOM and PC connection cable (see Accessories) alterable | | |

Functional Safety / Safety Integrity Level (SIL)*

according to DIN EN 61508 part 1 to part 7 and DIN EN 61511 part 1 to part 3, SIL2;
please pay attention to our document U400!

* only in conjunction with integrated transducer UVA (see above)

compatible separate evaluation units**(necessary in conjunction with VA Di sensors without integrated transducer UVA)**

| | |
|-------------------------|--|
| for non-Ex applications | UVA, µP-Vortex, VT-VA, VP-VA, VTP-VA |
| for Ex-applications | isolation/supply unit LDX2 in LDG16 housing in combination with evaluation units UVA, µP-Vortex, VT-VA, VP-VA, VTP-VA in LDG housing (additional requirement: Ex-input t, p) |

Accessories (optional)

| | description | art. no. |
|------------------------|---|-----------------|
| LCD in housing cover** | Line 1: 'instantaneous value': flow rate or flow velocity Line 2: 'quantity counter' or 'error code'; 2 x 16 digit, character height 5.5 mm, working temperature range -25 ... +60 °C | A010/016 |

** only in conjunction with integrated transducer UVA (see above)

Accessories (optional) (cont.)

| | description | art. no. |
|--|---|-----------------|
| PC software UCOM*° | for configuring transducers UFA and UVA via RS232 interface, PC connection cable RJ22 / sub-D 9-pin additional requirement | A010/052 |
| PC connection cable RJ22 / sub-D 9-pin*° | for configuring transducers UFA and UVA in LDG16 or AS102 housing via RS232 interface together with UCOM software; transducer connection: RJ22 PC connection: sub-D 9-pin | A010/051 |
| Interface converter*° USB / RS232 | for connecting PC to USB port and Höntzsch programming adapter to RS232 interface; PC connection: USB plug type A prog. adapter connection: sub-D 9-pin | A010/100 |

*° only in conjunction with integrated transducer UVA (see above)

Process flange TP

for one temperature sensor (T) and one pressure sensor (P)

| identification | art. no. | inside diameter Di [mm] |
|-----------------------|--------------------------------------|--------------------------------|
| TP Di/DN 40 PN16 | B015/101 | 40 |
| TP Di/DN 50 PN16 | B015/102 | 50 |
| TP Di/DN 80 PN16 | B015/103 | 80 |
| TP Di/DN100 PN16 | B015/104 | 100 |
| Material | stainless steel 1.4571 | |
| Connecting thread | 2 x G 1/4 " | |
| Installation point | down stream, behind the VA Di sensor | |

Flow rectifier

for reducing the input section - including flow rectifier - to 11 x Di

| Identification | art. no. | Inside diameter Di [mm] |
|-----------------------|---|--------------------------------|
| GL Di/DN 40 PN16 | B015/151 | 40 |
| GL Di/DN 50 PN16 | B015/152 | 50 |
| GL Di/DN 80 PN16 | B015/153 | 80 |
| GL Di/DN 100 PN16 | B015/154 | 100 |
| Material | stainless steel 1.4571 | |
| Installation point | 5 ... 8 x Di in front of the VA Di sensor (see Operating Instructions U283_VADi_B_d) | |
